

Google Workspace with Gemini enables the future of AI-powered work for every business

AI is foundational to the future of work but until now it has only been available to a select few. We believe its transformative power should be accessible to everyone. Google is taking AI innovation a step further by enabling it for every person, in every role, in every business. We're helping teams innovate without barriers.

Now, the best of Google's AI-first applications, Gemini, and NotebookLM are included in Workspace Business and Enterprise plans. Now, every business has the tools they need to do their best work—without the need to purchase any add-ons.
